The Journal of Experimental Biology

600

EDITED BY

J. GRAY

ASSISTED BY

THE HON. SECRETARIES, SOCIETY FOR EXPERIMENTAL BIOLOGY

VOLUME XXVII

CAMBRIDGE
AT THE UNIVERSITY PRESS
1950

Published for the Company of Biologists, Limited

Printed in Great Britain at the University Press, Cambridge
(Brooke Crutchley, University Printer)
and published by the Cambridge University Press

London: Bentley House, N.W. 1
American Branch: New York

Agents for Canada, India, and Pakistan: Macmillan

CONTENTS

No. 1. MAY 1950

PAGE

KENNETH D. ROEDER AND ELIZABETH A. WEIANT. The electrical and mechanical events of neuro-muscular transmission in the cockroach, *Periplaneta americana* (L.) (With Plate 1 and Four Text-figures) 1

C. A. HAYWOOD AND H. P. MOON. The mechanics of the blood vascular system of *Ascidiella aspersa*. (With Ten Text-figures) 14

GARTH CHAPMAN. Of the movement of worms. (With Three Text-figures) . . 29

R. F. EWER. The effect of pituitrin injection on the water balance of *Bufo regularis* Reuss. (With Three Text-figures) 40

M. J. FEAKES, E. P. HODGKIN, R. STRAHAN AND H. WARING. The effect of posterior lobe pituitary extracts on the blood pressure of *Ornithorhynchus* (duck-billed platypus). (With Four Text-figures) 50

LORD ROTHSCHILD AND P. H. TUFT. The physiology of sea-urchin spermatozoa. The dilution effect in relation to copper and zinc. (With Six Text-figures) 59

BARBARA M. WALSHE. The function of haemoglobin in *Chironomus plumosus* under natural conditions. (With Six Text-figures) 73

L. C. BEADLE AND J. SHAW. The retention of salt and the regulation of the non-protein nitrogen fraction in the blood of the aquatic larva, *Sialis lutaria*. (With Five Text-figures) 96

G. E. NEWELL. The role of the coelomic fluid in the movements of earthworms. (With One Text-figure) 110

No. 2. SEPTEMBER 1950

H. BARNES AND LORD ROTHSCHILD. A note on the copper content of sea-urchin semen and sea water 123

C. H. WADDINGTON AND T. YAO. Studies on regional specificity within the organization centre of urodeles. (With Fifteen Text-figures) 126

J. A. RAMSAY. Osmotic regulation in mosquito larvae. (With Plate 2 and Two Text-figures) 145

L. LEVENBOOK. The physiology of carbon dioxide transport in insect blood. Part I. The form of carbon dioxide present in *Gastrophilus* larva blood. (With Two Text-figures) 158

L. LEVENBOOK AND A. M. CLARK. The physiology of carbon dioxide transport in insect blood. Part II. The effect of insect blood on the rate of hydration of CO_2. (With Six Text-figures) 175

L. LEVENBOOK. The physiology of carbon dioxide transport in insect blood. Part III. The buffer capacity of *Gastrophilus* blood. (With Three Text-figures) . . 184

D. H. WILKINSON. Flight recorders. A technique for the study of bird navigation. (With Three Text-figures) 192

ERIC PONDER. A quantitative study of the fragmentation and haemolysis of mammalian red cells by heat. (With Three Text-figures) 198

ELISABETH I. B. DRESEL AND VIVIEN MOYLE. Nitrogenous excretion of amphipods and isopods 210

PAGE

M. M. Swann and J. M. Mitchison. Refinements in polarized light microscopy. (With Plate 3 and Seven Text-figures) 226

H. Hurst. An electron diffraction study of the crystalline structure of the lipids in the pupal exuviae of *Calliphora erythrocephala*. (With Plates 4–6 and One Text-figure) 238

Nos. 3 & 4. DECEMBER 1950

Luigi Califano and Enzo Boeri. Studies on haemovanadin. III. Some physiological properties of haemovanadin, the vanadium compound of the blood of *Phallusia mamillata* Cuv. 253

W. S. Bullough and E. A. Eisa. The diurnal variations in the tissue glycogen content and their relation to mitotic activity in the adult male mouse. (With Two Text-figures) 257

E. J. Batham and C. F. A. Pantin. Muscular and hydrostatic action in the sea-anemone *Metridium senile* (L.). (With Plate 7 and Nine Text-figures) . . 264

E. J. Batham and C. F. A. Pantin. Inherent activity in the sea-anemone, *Metridium senile* (L.). (With Six Text-figures) 290

C. R. Ribbands. Changes in the behaviour of honey-bees following their recovery from anaesthesia 302

M. R. A. Chance and D. C. Yaxley. Central nervous function and changes in brain metabolite concentration. I. Glycogen and lactate in convulsing mice. (With Three Text-figures) 311

J. C. Mott. Radiological observations on the cardio-vascular system in *Anguilla anguilla*. (With Plates 8–10 and Two Text-figures) 324

Peter Tuft. A new micro-respirometer with automatic setting and recording apparatus. (With Plate 11 and Ten Text-figures) 334

D. M. Steven. Some properties of the photoreceptors of the brook lamprey. (With Ten Text-figures) 350

M. J. Way and B. A. Hopkins. The influence of photoperiod and temperature on the induction of diapause in *Diataraxia oleracea* L. (Lepidoptera). (With Five Text-figures) 365

E. J. Batham and C. F. A. Pantin. Phases of activity in the sea-anemone, *Metridium senile* (L.), and their relation to external stimuli. (With Eleven Text-figures) 377

Lord Rothschild and M. M. Swann. The fertilization reaction in the sea-urchin egg. The effect of nicotine. (With Plate 12 and One Text-figure) . . 400

J. A. Ramsay. The determination of sodium in small volumes of fluid by flame photometry. (With Two Text-figures) 407

Lord Rothschild. The respiration of sea-urchin spermatozoa. (With Four Text-figures) 420

Lewis Davies. The hatching mechanism of muscid eggs (Diptera). (With Three Text-figures) 437

Anne Rowlands. The influence of water and light upon the pigmentary system in the common frog *Rana temporaria*. (With Eight Text-figures) . . . 446

B. M. Jones. The sensory physiology of the harvest mite *Trombicula autumnalis* Shaw. (With Twenty-four Text-figures) 461

Index 495
